

## Department of Architecture

The Department of Architecture was founded in the 1942-1943 academic year and since then it has constantly strived to change and transform itself around the principle of modernization.

Today, the movement on an international scale of the individual and information has become increasingly important and our department and its esteemed academic staff incorporating this outlook produce knowledge in the field of architecture, disseminate this knowledge both in theoretical and practical fields in various contexts and pass this knowledge on to future architects.

Our educational program aims to transmit basic architectural knowledge, to develop architectural competence, aid in the transformation of an aesthetic view into form, to teach intellectual methods and approaches enabling the use of creativity and to instruct students in the protection of personal rights within the legal context and to establish a sense of professional ethics.

In addition to the organization of symposiums, exhibitions, conferences, seminars and workshops, extracurricular educational activities include student exchange programs, technical trips and internships.

Our department carries out various activities in monitoring and applying international educational standards and is a member of the EAAE (European Association for Architectural Education) and the CIB (International Council for Research and Innovation in Building and Construction).

The department has four divisions with academic staff including 14 professors, 20 associate professors, 29 assistant professors, 4 teaching staff, 8 research assistants holding PhDs, 36 research assistants and 1 specialist holding a PhD.

### Division

### Subdivision

Building Theory and Design

- Environmental Design
- Architectural Design Theory and Methodologies
- Computer Aided Architectural Design
- Architectural Design Issues

Building Science

- Building Elements and Materials
- Housing Production and Building Management
- Structural Systems
- Building Physics

Architectural Conservation

- Evolution of Historical Environment
- Renovation and Conservation

History of Architecture

- History of Art and Architecture
