

Faculty of Arts and Science

General Information

Yıldız Technical University Faculty of Arts and Science provides high-quality education in the fields of basic sciences and language and also aims to establish an awareness of critical thought in its students to develop their abilities of independent research and constant self-renewal. Our faculty educates creative individuals who will form the intellectual force serving society and science in the fields of science and literature. Our educational approach is guided by the awareness of a world led by reason and science.

Numerous elective courses introduced at all departments every semester allow students to gain knowledge in scientific topics outside their main branches and therefore prepare for their professional lives in a more comprehensive manner.

The basic courses presented at all departments of our university are also taught at our faculty.
