

Department of Biology

The Department of Biology, founded in 1999, is an exclusively postgraduate institution.

Postgraduate studies at the department focus mostly on plant molecular biology and genetics and plant chemistry. In addition, research on mammal and human genetics are also carried out.

Preparations towards a graduate program with Molecular Biology and Genetics Departments continue.

Our academic staff of 2 professors, 4 assistant professors and 5 research assistants continue their educational and research activities.

Only the General Biology and Molecular Biology Departments of the 4 divisions affiliated with the department are active in education.

Divisions

- General Biology
- Molecular Biology
- Botanical Studies
- Zoology
