

Department of Computer Education and Instructional Technologies

The Department of Computer Education and Instructional Technologies is a department founded to educate computer teachers and instructional technologists.

This undergraduate program has two aims: The first is to train computer teachers with the main professional knowledge and abilities to be appointed in primary and secondary education. The second aim is to train instructional technologists equipped in the fields of design, development, application and assessment of instructional materials and instructional software suitable to curricula and the pedagogic level of the students.

Our department has a single division with an academic staff of 1 professor, 1 assistant professor, 2 teaching staff and 6 research assistants.
