

Department of Electronics and Communication Engineering

The Department of Electronics and Communication Engineering was established in 1982.

With its constantly developing infrastructure and teaching staff and assistants, the department presents education at contemporary standards. The aim of the department is to educate engineers who can contribute to the rapid development of the electronics industry and who can compete, think, research and produce at international standards.

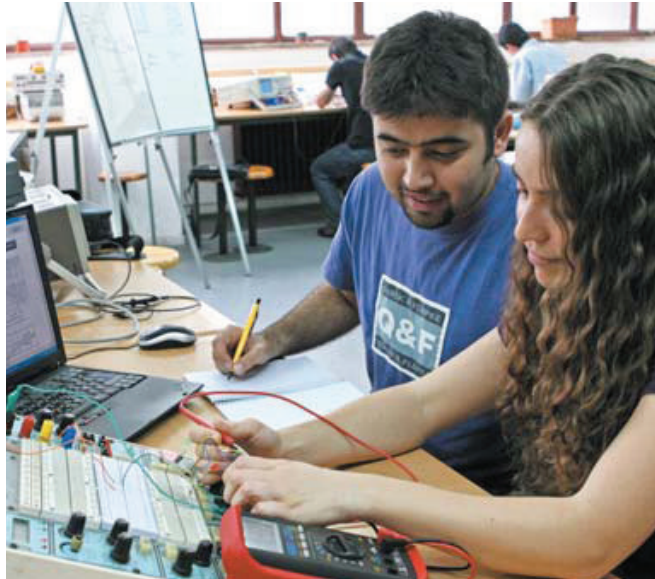

For this end, the department curriculum is constantly renewed in line with developments in technology.

In addition to basic electronics and circuits laboratories, there are also communication, antenna and microwaves, power electronics, microelectronic design and microprocessor laboratories in the department. In addition,

the department of electronics and communication engineering hosts the only GSM testing and measurement laboratory in Turkey.

Departmental staff includes 5 professors, 1 associate professor, 11 assistant professors and 20 research assistants, and the department has four divisions specializing in their respective fields:

Divisions

- Electronics Division
- Telecommunication Division
- Circuits and Systems Division
- Electromagnetic Fields and Microwave Techniques Division
