

Department of Physics

The Department of Physics carries out educational, research and development activities in basic and applied physics.

Our aim is to educate well-qualified and ethical physicists with the laboratory experience and knowledge to contribute to R&D work and technology production.

Both engineering students and undergraduate students continue work at the Solid State, Thin Film, Photonics, Polymer, Organic Electronics and Optical Spectroscopy laboratories. Our department also incorporates a Computer Simulation Laboratory and a Theoretical Liquid State Laboratory where simulation work is carried out.

Our department has 6 divisions with an academic staff including 14 professors, 2 associate professors, 19 assistant professors, 3 teaching staff, 7 research assistants holding PhDs and 17 research assistants.

Divisions

- Atom and Molecular Physics
- General Physics
- High Energy and Plasma Physics
- Mathematical Physics
- Nuclear Physics
- Solid State Physics
